ORBI RBK50
SETUP

MANUAL

PDF

Table of
Contents

Phase 1

➤ Physical Setup

Locate the units. The router is called RBR50 and the satellite RBS50 that aims to expand coverage.

Phase 2

➤ Connect the modem to the router:

1. Shut off the modem.
2. Connect the yellow ethernet wire to the modem and router WAN ports.
3. Go to the router once the modem turns on.
4. The router is ready when the router ring LED flashes white and solidifies.

Phase 3

### ❯❯ Connect The Satellite to the Router

- Place it 2–3 rooms away from the router, where it is possible for both the devices to transmit signals easily.
- Turn on the satellite; the LED flashes white and then changes colour and different colors mean different:

  Blue indicates ultimate connection
  Amber means fair (bring it closer to the router)
  Magenta means not connected (resync or move)

If magenta stays for long duration, tap Sync on both devices within two minutes. Then the satellites sync up on their own and the LED goes out.

## Configuration Via Both App and Browser

1. Setup Via Mobile App

▶ Get the orbi app from either the App Store or the Google Play Store; it works with both iOS and Android.

▶ Sign in or create a Netgear account.

▶ You can perform Orbi RBR50 setupby tapping it and scanning the router's QR code.

▶ Follow the instructions: check the wires and electricity, then wait for the LEDs.

▶ Make a new SSID, WiFi password, admin login, and security questions.

▶ When asked, plug in the satellites and follow the directions for pairing.

2. **Setup Via Browser**

▶ Connect your PC to the Orbi network via WiFi or Ethernet.

▶ Go to orbilogin.net or 192.168.1.1. Enter admin/password. (Details mentioned on device's label).

▶ Launch the Setup Wizard to configure internet settings like DHCP/PPPoE and IPv6.

▶ After Orbi RBR50 setup, connect satellite by selecting "Add Orbi Satellite," connecting it in, and pressing the "Sync Button."
